

## Our Sharpening Services

Chances are you have many valuable dental scalars, curettes, elevators, explorers, osteotomes, chisels and scissors that are not working nearly as well as they should. Send them to us and if they can be rehabilitated, we will do it and send them back to you as quickly as we can (often the next day).

### How to use our service

Call Stephanie before sending instruments to be sure we are in the office to accept the instruments

Send your instruments to:

Hale Veterinary Clinic,  
159 Fife Road,  
Guelph, ON,  
N1H 7N8

Include a return courier bill of lading and shipping will be charged to your courier account. Otherwise shipping and handling will be added to your invoice.

Stainless	\$ 6.00
Carbide	\$ 10.00

### Other Instruments

Send them along and we can call with a price.

### Dental Instrument Sharpening Course

This three hour workshop will outline the benefits of sharpening, the anatomy of dental hand instruments, the materials needed for sharpening and an overview of sharpening techniques. After a pause for refreshments, participants will practice sharpening their own instruments (scalars, curettes, elevators...)

Tuition includes the course, an illustrated hand out, a pair of sharpening stones, an acrylic test stick and excellent teacher to student ratio. Time permitting, Dr. Hale will rehabilitate some of your seriously mangled tools.

**Contact us for the next course date and pricing.**
